DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Abu-Isa (U.S. Patent 6,395,357). Regarding Claim 17, Abu-Isa shows that it is known to carry out a method for forming a compression molded fuel tank (Abstract; Column 2, lines 42-43), which comprises compression molding first and second laminates for first and second sections of said fuel tank (Figure 1, elements 14, 16) each having at least two dissimilar materials (Figure 2), wherein the laminate of each section includes an outer plastic film layer and an inner plastic layer (Figure 2, elements 30, 40); affixing said sections together at peripheral portions thereof to form a closed hollow member with an internal cavity therein (Column 2, lines 40-43); and forming an inlet to said internal cavity (Figure 1, spout portion).

Regarding Claim 18, Abu-Isa shows the process as claimed as discussed in the rejection of Claim 17 above, including a method comprising affixing said sections together at a peripheral flange of each section (Figure 1; Column 2, lines 40-43).

Art Unit: 1732

Regarding Claim 19, Abu-Isa shows the process as claimed as discussed in the rejection of Claim 17 above, including a method comprising providing that the film is a monolayer film (Figure 2, element 40).

Regarding Claim 20, Abu-Isa shows the process as claimed as discussed in the rejection of Claim 17 above, including a method comprising providing at least two inner plastic layers (Figure 2, elements 30, 32, 34, 36, 38).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patent is cited to further show the state of the art with regard to compression molding laminated materials in general:
